

## DOLFINES

Engineering-Heavy Constr. / France

## Capital increase to bring some order

## Pros

- 8.2 France (wind services) will reduce the group's exposure to oil price fluctuations and lower its cyclical
- Floating offshore wind is a >200GW (by 2050) mostly untapped market in which Dolfines can contribute its extensive off-shore know-how and experience
- Oil & gas activities see a rebound in 2022 and supported by high oil prices

## Cons

- Client concentration and project delays can have a large impact on a small company
- In the floating offshore wind market, Dolfines' main competitors are several years ahead in terms of developments
- The increased size of future offshore wind auctions could restrain small players' access to market
